Post Form

Include tips on certain fields to help mitigate what CS tells users makes a good posting

Save info from following fields (both fill out profile & prefill subsequent post forms): location (maybe grab from billing info instead?), industry, why company great.

Save as draft   POST   validation

remove:
intake session
standing bounty

5A
Your draft has been saved.
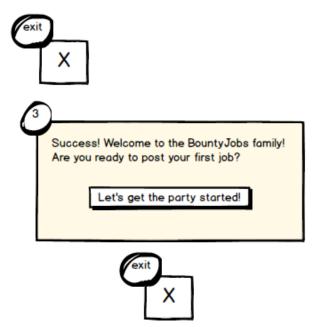

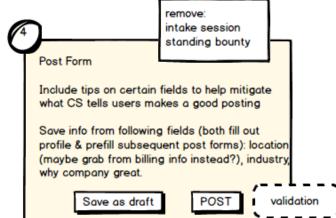

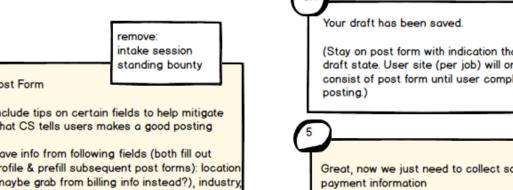

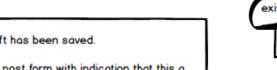

(Stay on post form with indication that this a draft state. User site (per job) will only consist of post form until user completes a posting.)

5
Great, now we just need to collect some payment information

set single job price we'll be charging but allow for upselling, boosting and marketing, OH MY!

enter CC info
save this address as default billing address? specifically ask and allow for input if different. Store this information as address/billing address/location in profile and post form...

promotional code --   apply
(passed through and/or allow for adding manually)
Show user that they are getting a discount

payment validation
